095-667-3129

ABOUT ME

Fourth-year Information Technology student seeking a Cooperative Education position as a Full-Stack or Front-end Developer. Experienced in building full-stack web applications with React, Next.js, TypeScript, and Node.js, including a multi-tenant SaaS platform with role-based access control, Prisma-based database modeling, and OAuth authentication. Familiar with RESTful API development, relational databases, and UI/UX principles. Eager to contribute to real-world software projects and grow in a collaborative team.

EDUCATION

Sripatum University
GPA: 3.70 / 4.00

Faculty of Information Technology,
Information and Communication Technology

2023 - Present

PROJECTS

Taskly — Task Management SaaS Live Demo: taskly-saa-s.vercel.app

Multi-tenant task management platform with role-based team collaboration.

- Built a multi-tenant architecture where users create isolated Workspaces with role-based access control (Owner/Admin/Member)
- Implemented Google OAuth authentication using Auth.js (NextAuth v5) and Prisma Adapter
- Developed a drag-and-drop Kanban board with optimistic UI updates and file attachment support via Supabase Storage
- Deployed to production on Vercel with PostgreSQL (Supabase)
- Technologies: Next.js (App Router), TypeScript, Prisma, PostgreSQL, Tailwind CSS, Auth.js

Shop Management System GitHub Repository: [alifeofbrooklyn/shop-management-system](https://github.com/alifeofbrooklyn/shop-management-system)

Full-stack web application for managing products, inventory, and sales.

- Implemented JWT-based authentication and password hashing with bcrypt
- Developed inventory and sales management features with automatic stock deduction
- Built a dashboard with charts for summarizing sales and inventory data
- Technologies: React, Vite, Tailwind CSS, Node.js, Express.js, MySQL

Mini Appointment App GitHub Repository: [alifeofbrooklyn/miniappointment-booking-system](https://github.com/alifeofbrooklyn/miniappointment-booking-system)

Full-stack web application for managing online appointment bookings.

- Designed and implemented a responsive appointment booking flow with React and Tailwind CSS
- Built RESTful CRUD APIs with input validation for appointment management
- Integrated Axios with an Express.js backend and MySQL database for data persistence
- Implemented loading states and toast notifications to improve user feedback
- Technologies: React, Vite, Tailwind CSS, Axios, Node.js, Express.js, MySQL

TECHNICAL SKILLS

- Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL
- Frontend: React, Next.js, Vite, Tailwind CSS, Axios, Recharts
- Backend: Node.js, Express.js, RESTful APIs, Next.js Route Handlers
- Database: MySQL, PostgreSQL
- ORM: Prisma
- Authentication: JWT, bcrypt, Auth.js, Google OAuth 2.0
- Cloud & Services: Vercel, Supabase
- Tools: Git, GitHub, Postman, Thunder Client, Figma, VS Code

SOFT SKILLS

- Problem Solving & Debugging
- Team Collaboration
- Agile Mindset & Self-Learning

LANGUAGES

- Thai: Native
- English: Technical Reading & Basic Communication
